# Arena Kits

Oakdale Equestrian Arena Kits is an innovative designed arena that can be used without a costly drainage system and in most cases without planning permission. The arenas have a specially designed membrane system which can be laid above ground. Then a base layer of recycled carpet and sand is compressed with an added top layer of carpet to create a riding surface which is suitable for most disciplines.

The surface drains quickly, and is easy to maintain. It provides good traction and rides with minimal impact on tendons and ligaments.

The fencing is of highest standard of redwood timber, which is sustainably sourced, treated to British standards with a desired service life of 15 years. The kit includes three rail fencing with a 300mm high kickboards. If required, an upgrade to reinforced white plastic fencing is available, which is four times the strength of wooden fence, economical, and requires no maintenance. The kit is completely supplied as DIY; however, we are happy to provide a quote for full installation.

# Turnout Pens

The idea began with the carpet turnout pens due to a severe case of laminitis with our own horses. We found the stress of weight bearing was made hugely bearable whilst on the road to recovery and allowed us to manage their weight and forage intake. We then widened our range of pens to suit different ailments on the yard. We have now applied it to the management of horses for sand colic and horses who suffer with COPD, allowing them to live out, and minimising the exposure to dust and spores. It also helps with the prevention of mud fever and thrush. We've also found it beneficial in keeping competition horses spotless.

The pens are an alternative to box rest, allowing recovering horses to still be outside and helps prevent stable vices. We can supply internal fencing to reduce size if been used for rehabilitation use. For horses on permanent turnout, shelters can be added for an additional price.

The pens are available in three different packages, Bronze Silver and Gold, please see additional leaflets.
